CYBERSEER
THE VISION TO PROTECT

THREATS FROM WITHIN:
# Five Ways to Boost Your Detection Capability & Capacity

STEP 1.
KNOW WHAT TO LOOK FOR:
Gain full visibility - Identify threats across the entire network.

STEP 2.
**EMPLOY ZERO TRUST:**
Trust nothing, verify everything.

STEP 3.
BRING IN THE BIG GUNS:
Use machine learning tools & advanced automation technologies to help you find meaningful signals in the noise, fast.

STEP 4.
FOCUS ON REDUCING TIME TO DETECTION:
Reduce Mean Time to Detection (MTTD) - develop a holistic approach to identify malicious or anomalous activity ASAP.

STEP 5.
GET REAL TIME THREAT DETECTION:
Get Ahead of Threats - Understand the latest threat hunting & exploit techniques as well as your attack surface.
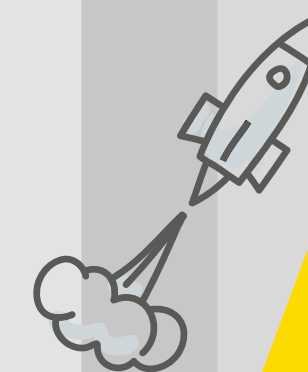

If you'd like help with planning out your threat detection, **get in touch with us today:**
